

# RAVI K GUPTA

## Senior Full Stack Engineer • Laravel, Go, React & Vue Applications

**Email:** dev.ravigupta@gmail.com • **Location:** Noida, Uttar Pradesh, India • **Mobile:** +91-8285893766

**LinkedIn:** linkedin.com/in/ravi-k-dev • **GitHub:** github.com/devravik • **Portfolio:** devravik.github.io

### EXECUTIVE SUMMARY

Full Stack Engineer with 12+ years of experience developing complete web applications, interactive dashboards, and backend services.

Hands-on across the full stack: Laravel, Go, and Node.js on the backend paired with Vue.js, React, and Next.js on the frontend. Manages feature development end-to-end-from database modeling and API endpoints to reactive UI components.

Comfortable owning complete features from schema design to frontend state management and containerized deployment.

### TECHNICAL SKILLS & COMPETENCIES

#### LANGUAGES & FRAMEWORKS

PHP / Laravel, Statamic, Go (Golang, Gin, Fiber), Node.js, Python (FastAPI), JavaScript / TypeScript, CodeIgniter, WordPress, PHPUnit / Pest

#### BACKEND & ARCHITECTURE

Backend architecture and system design, Tenant isolation strategies (shared and isolated), Microservices architecture and service decomposition, GraphQL & gRPC API design, Event streaming with Kafka, Real-time updates with Pusher, Background processing pipelines and queues, JWT, OAuth2 & stateless API authentication

#### DATA & SEARCH

Relational database design (MySQL, PostgreSQL), NoSQL databases (MongoDB), Query optimization and indexing, Algolia, Meilisearch, Elasticsearch, Supabase, Neon DB

#### CLOUD, DEVOPS & RELIABILITY

AWS (S3, EC2, SES, RDS), DigitalOcean, Vercel, Google Cloud Platform (GCP), Azure, Docker & containers, Kubernetes, Serverless container deployment, GitHub Actions / CI/CD, Nginx & Apache web servers, Linux server administration, Caching layers and Redis, Observability and application monitoring

#### FRONTEND & APPS

Vue.js, React, Next.js, React Native (Expo), Laravel Blade / Livewire, Tailwind CSS, shadcn/ui

#### AI & DEV TOOLS

Claude (Anthropic), OpenAI / GPT-4o, DeepSeek, Cursor, OpenCode, Ollama (local LLMs), LangChain, Google (Gemini)

### EDUCATION & ACADEMIC QUALIFICATIONS

#### Bachelor of Technology (B.Tech.)

2008 - 2012

Uttar Pradesh Technical University

#### Intermediate (Class XII)

2008

Board of High School and Intermediate Education Uttar Pradesh, India

Subjects: Physics, Chemistry, Mathematics, English

## PROFESSIONAL EXPERIENCE

---

Over 12+ years of hands-on backend & systems engineering experience (2014 - Present).

### Senior Software Engineer · Full-time

Waggingtail Technology Limited (waggingtail.co)

Oct 2018 - Present  
Delhi, India · Remote

Lead backend engineer across several client products - responsible for backend direction, architecture, and keeping systems healthy as traffic and scope grow.

- Architected backend infrastructure and relational schemas for 8+ enterprise SaaS products.
- Engineered 60+ RESTful API endpoints in Laravel and Go (Fiber) with 99.9% production uptime.
- Designed tenant isolation architectures securing data partitions across 100+ active client instances.
- Reduced API response times by up to 65% and cut report query runtimes from 3.5s to under 180ms.
- Configured Redis queues, offloading 100k+ daily background tasks and eliminating UI thread blocking.
- Integrated 10+ payment gateways and third-party APIs, reducing transaction drop rates by 40%.
- Automated GitHub Actions CI/CD pipelines across AWS and Vercel, trimming deployment times to <10 mins.
- Mentored 5+ junior developers and led code reviews, reducing post-release bug rates by ~30%.

### Senior Programmer

Infoicon Technologies (infoicontechnologies.com)

Jun 2015 - Oct 2018  
Noida, Uttar Pradesh, India · On-site

Backend-focused developer on multiple client projects, usually responsible for APIs and data-heavy parts of the system.

- Spearheaded 30+ RESTful APIs for 10+ web applications, serving 50k+ monthly active users.
- Formulated modular PHP/Laravel components, shortening developer onboarding cycles by 35%.
- Optimized slow SQL queries and database indexes, reducing average page render times by 40%.
- Constructed search and filtering modules indexing 100k+ catalog records with sub-second retrieval.
- Orchestrated 15+ third-party API integrations, handling over 25k daily webhook transactions.
- Provisioned background task queues processing 50k+ daily automated reports and data syncs.

### Sr. Web Developer

Webzesty Pvt Ltd (webzesty.net)

Apr 2014 - Jun 2015  
Delhi, India · On-site

Worked on full-stack web applications using PHP frameworks and JavaScript frontends.

- Authored 20+ core backend features and services using Laravel and CodeIgniter across client apps.
- Structured and normalized 15+ MySQL database schemas with zero data integrity issues.
- Established 25+ RESTful JSON endpoints connecting Laravel backends with Vue.js interfaces.
- Crafted interactive UI components with Vue.js, reducing user interaction load times by 30%.
- Remediated 100+ bug tickets and performance bottlenecks, upholding 99%+ production uptime.

### Web Developer

SunHill Systems Pvt Ltd (sunhill.in)

Jan 2014 - Apr 2014  
Delhi, India · On-site

First role in web development, focused on server-side features and smaller enhancements.

- Assisted in building server-side features and data logic for 5+ web application projects.
- Programmed REST API endpoints connecting PHP backends with third-party web services.
- Formulated optimized MySQL queries to securely store and retrieve high-volume user data.
- Rectified 30+ issue tickets and delivered feature additions ahead of sprint milestones.
- Partnered with senior developers to establish clean code modularity and application security.

## FEATURED PROJECTS & SAAS PRODUCTS

---

### Genexr Analytics

genexr.com

Product · Senior Backend Engineer

Analytics and reporting layer for SaaS products. It exposes a clean API for sending events and gives each tenant its own dashboards, charts, and exports.

**Tech Used:** Go (Fiber) services behind a simple HTTP API, Next.js reporting dashboard, PostgreSQL schema tuned for analytics queries, Tenant-aware routing, auth, and data isolation, Background jobs for aggregations and exports

### Fonefix Repair Management System

fonefix.co.nz

Digital Transformation · Senior Backend Engineer · Waggingtail

Backend behind a large device repair business - handles bookings, job state, technician updates, and the operational reporting the team runs their day on.

**Tech Used:** Workflow-driven backend design, Data modeling for the full repair lifecycle, Job and technician scheduling, Internal reporting for branches and teams

### GigHQ

gighq.co.nz

Digital Businesses · Senior Backend Engineer · Waggingtail

Community and booking platform that connects musicians with hospitality venues, with feeds, profiles, and event workflows.

**Tech Used:** Community and booking workflows, Artist, venue, and event data modeling, Search across artists and gigs, Payment flows for bookings

### Planolitix

planolitix.com

Financial Tools · Senior Backend Engineer · Waggingtail

Financial diagnostic tool that uses cashflow modeling to show clients how their position changes across different life stages.

**Tech Used:** Financial data modeling, Long-horizon cashflow calculations, Graph-based reporting, Performance-focused SQL tuning

### Skillsnacks

skillsnacks.com

Digital Learning · Senior Backend Engineer · Waggingtail

Microlearning platform for retail sales teams, with snack-sized lessons and coaching activities behind a subscription model.

**Tech Used:** Subscription access model, Learning content and assessment data structures, Engagement and progress tracking, Multi-tenant delivery for different brands

### AttendAssist

devravik.github.io/attendassist Play Store

Product · Independent Software Developer

Attendance management app focused on making the daily check-in/out process simple for teachers and teams.

**Tech Used:** React Native (Expo), Mobile-first API design, Attendance data modeling, Auth and role management, CI/CD for mobile and backend

### KundaliLabs

kundalilabs.com Play Store

Product · Independent Software Developer

github.com/devravik/kundalilabs

AI-powered Vedic astrology platform using Swiss Ephemeris for all calculations and GPT-4o for interpretations. Covers Janam Kundli, daily horoscope, Panchang, Dasha timeline, Kundli matching, and numerology across 10 Indian languages. Available as a live web app and a mobile app on the Play Store.

**Tech Used:** FastAPI (Python) backend, React + Vite frontend, PostgreSQL, Swiss Ephemeris for Jyotish calculations, OpenAI GPT-4o for AI interpretations, React Native mobile app

## OPEN SOURCE CONTRIBUTIONS

---

### Laravel Licensing

[packagist.org/packages/devravik/laravel-licensing](https://packagist.org/packages/devravik/laravel-licensing)

[github.com/devravik/laravel-licensing](https://github.com/devravik/laravel-licensing)

A production-ready Laravel package for generating, managing, activating, and validating software licenses directly inside your application. License keys are hashed before storage (never plaintext in the database), activations are seat-controlled, and the entire lifecycle creation, validation, activation, revocation, and expiry is covered by typed exceptions and dispatchable events.

**Tech Used:** Laravel 10/11/12, Bcrypt key hashing, Seat-based activations, Polymorphic ownership, Event-driven architecture

### Laravel Licensing Starter

[github.com/devravik/laravel-licensing-starter](https://github.com/devravik/laravel-licensing-starter)

A starter kit demonstrating devravik/laravel-licensing - a Laravel package for generating, managing, activating, and validating software licenses. This project combines Laravel Breeze (authentication) with a full license management dashboard so you can see the complete workflow in action.

**Tech Used:** Laravel Breeze, License management dashboard, Full workflow demonstration, API endpoints, Demo data & examples

### Laravel Extended Resources

[github.com/devravik/extended-resources](https://github.com/devravik/extended-resources)

[packagist.org/packages/devravik/extended-resources](https://packagist.org/packages/devravik/extended-resources)

A Laravel API resources extension that lets you define multiple named formats using PHP 8 attributes, modify serialized data on the fly, use helpers like `only()/except()`, and set the HTTP status code from the resource while still feeling native to Laravel.

**Tech Used:** Laravel 10/11/12, PHP 8.1+, API Resources, PHP 8 attributes, Response helpers

### RedditRadar

[github.com/devravik/RedditRadar](https://github.com/devravik/RedditRadar)

Self-hosted Reddit lead discovery and AI analysis for engineers. Monitors subreddits for hiring posts and founder pain points, scores them against a custom engineer profile, pre-filters noise before LLM inference, and tracks outreach - a lightweight alternative to expensive SaaS lead tools.

**Tech Used:** Next.js 16 (App Router), Prisma 7 + PostgreSQL, Tailwind CSS + shadcn/ui, OpenAI / OpenRouter / Groq, Reddit JSON API

### Go License API

[github.com/devravik/go-license-api](https://github.com/devravik/go-license-api)

High-performance, self-hosted license validation service built in Go. Covers everything from simple plugin licensing to large-scale SaaS enforcement: multi-tenant isolation, seat tracking, offline licenses (Ed25519), key rotation, webhooks, and audit logging. Validation runs entirely from an in-memory cache with no DB in the hot path, targeting sub-millisecond p95 latency.

**Tech Used:** Go 1.21+, PostgreSQL 14+, Redis (optional L2 cache), Ed25519 offline signing, Docker + Kubernetes

### TalkBridge

[github.com/devravik/TalkBridge](https://github.com/devravik/TalkBridge)

Real-time video calls with live AI-translated captions - no app, no account, just a link. Speech is transcribed via Deepgram Nova-2 and translated by Azure Cognitive Services in under 500ms end-to-end, overlaid as live captions on the video feed. Supports 10 languages with an LLM fallback when Azure is unavailable.

**Tech Used:** Go (Fiber) + Gorilla WebSocket, Next.js 14, TypeScript, Tailwind CSS, WebRTC P2P video and audio, Deepgram Nova-2 streaming STT, Azure Cognitive Services Translator, PostgreSQL
