

# RAVI K GUPTA

Senior Python & FastAPI Developer • Async Microservices & AI Integrations

Email: dev.ravikgupt@gmail.com • Location: Delhi, India • Mobile: +91-8285893766

LinkedIn: linkedin.com/in/ravi-k-dev • GitHub: github.com/devravik • Portfolio: devravik.github.io

## EXECUTIVE SUMMARY

Senior Python Developer with 12+ years of software engineering experience developing asynchronous APIs, backend services, and AI integrations.

Core stack includes FastAPI, Pydantic v2, AsyncIO, SQLAlchemy/SQLModel, Celery, Redis, and PostgreSQL. Experienced connecting LLM APIs (OpenAI, Deepgram, Azure) with real-time WebSocket connections and background task queues.

Emphasizes typed Python 3.12+ code, structured PyTest coverage, clear API documentation, and containerized cloud deployment.

## TECHNICAL SKILLS & COMPETENCIES

### LANGUAGES & FRAMEWORKS

PHP / Laravel, Statamic, Go (Golang, Gin, Fiber), Node.js, Python (FastAPI), JavaScript / TypeScript, CodeIgniter, WordPress, PHPUnit / Pest

### BACKEND & ARCHITECTURE

Backend architecture and system design, Data modeling for real-world, messy domains, Tenant isolation strategies (shared and isolated), Horizontal scaling and performance tuning, Microservices architecture and service decomposition, GraphQL API design, Background processing pipelines and queues, JWT and stateless API authentication

### DATA & SEARCH

Relational database design (MySQL, PostgreSQL), NoSQL databases (MongoDB), Query optimization and indexing, Algolia, Meilisearch, Elasticsearch, Supabase, Neon

### CLOUD, DEVOPS & RELIABILITY

AWS (S3, EC2, SES, RDS), DigitalOcean, Vercel, Google Cloud Platform (GCP), Azure, Docker & containers, Kubernetes, Serverless container deployment, GitHub Actions / CI/CD, Nginx & Apache web servers, Linux server administration, Caching layers and Redis, Observability and application monitoring

### FRONTEND & APPS

Vue.js, React, Next.js, React Native (Expo), Laravel Blade / Livewire, Tailwind CSS

### AI & DEV TOOLS

Claude (Anthropic), OpenAI / GPT-4o, DeepSeek, Cursor, OpenCode, Ollama (local LLMs), LangChain, Google (Gemini)

## EDUCATION & ACADEMIC QUALIFICATIONS

### Bachelor of Technology (B.Tech.)

2008 - 2012

Uttar Pradesh Technical University

### Intermediate (Class XII)

2008

Board of High School and Intermediate Education Uttar Pradesh, India

Subjects: Physics, Chemistry, Mathematics, English

## PROFESSIONAL EXPERIENCE

---

Over 12+ years of hands-on backend & systems engineering experience (2014 - Present).

### Senior Software Engineer · Full-time

Waggingtail Technology Limited (waggingtail.co)

Oct 2018 - Present  
Delhi, India · Remote

Lead backend engineer across several client products - responsible for backend direction, architecture, and keeping systems healthy as traffic and scope grow.

- Architected backend infrastructure and relational schemas for 8+ enterprise SaaS products.
- Engineered 60+ RESTful API endpoints in Laravel and Go (Fiber) with 99.9% production uptime.
- Designed tenant isolation architectures securing data partitions across 100+ active client instances.
- Reduced API response times by up to 65% and cut report query runtimes from 3.5s to under 180ms.
- Configured Redis queues, offloading 100k+ daily background tasks and eliminating UI thread blocking.
- Integrated 10+ payment gateways and third-party APIs, reducing transaction drop rates by 40%.
- Automated GitHub Actions CI/CD pipelines across AWS and Vercel, trimming deployment times to <10 mins.
- Mentored 5+ junior developers and led code reviews, reducing post-release bug rates by ~30%.

### Senior Programmer

Infoicon Technologies (infoicontechnologies.com)

Jun 2015 - Oct 2018  
Noida, Uttar Pradesh, India

Backend-focused developer on multiple client projects, usually responsible for APIs and data-heavy parts of the system.

- Spearheaded 30+ RESTful APIs for 10+ web applications, serving 50k+ monthly active users.
- Formulated modular PHP/Laravel components, shortening developer onboarding cycles by 35%.
- Optimized slow SQL queries and database indexes, reducing average page render times by 40%.
- Constructed search and filtering modules indexing 100k+ catalog records with sub-second retrieval.
- Orchestrated 15+ third-party API integrations, handling over 25k daily webhook transactions.
- Provisioned background task queues processing 50k+ daily automated reports and data syncs.

### Sr. Web Developer

Webzesty Pvt Ltd (webzesty.net)

Apr 2014 - Jun 2015  
Greater Delhi Area · On-site

Worked on full-stack web applications using PHP frameworks and JavaScript frontends.

- Authored 20+ core backend features and services using Laravel and CodeIgniter across client apps.
- Structured and normalized 15+ MySQL database schemas with zero data integrity issues.
- Established 25+ RESTful JSON endpoints connecting Laravel backends with Vue.js interfaces.
- Crafted interactive UI components with Vue.js, reducing user interaction load times by 30%.
- Remediated 100+ bug tickets and performance bottlenecks, upholding 99%+ production uptime.

### Web Developer

SunHill Systems Pvt Ltd (sunhill.in)

Jan 2014 - Apr 2014  
Greater Delhi Area · On-site

First role in web development, focused on server-side features and smaller enhancements.

- Assisted in building server-side features and data logic for 5+ web application projects.
- Programmed REST API endpoints connecting PHP backends with third-party web services.
- Formulated optimized MySQL queries to securely store and retrieve high-volume user data.
- Rectified 30+ issue tickets and delivered feature additions ahead of sprint milestones.
- Partnered with senior developers to establish clean code modularity and application security.

## FEATURED PROJECTS & SAAS PRODUCTS

---

### Genexr Analytics

[genexr.com](https://genexr.com)

Product · Senior Backend Engineer (Founder)

Analytics and reporting layer for SaaS products. It exposes a clean API for sending events and gives each tenant its own dashboards, charts, and exports.

**Tech Used:** Go (Fiber) services behind a simple HTTP API, Next.js reporting dashboard, PostgreSQL schema tuned for analytics queries, Tenant-aware routing, auth, and data isolation, Background jobs for aggregations and exports

### Fonefix Repair Management System

[fonefix.co.nz](https://fonefix.co.nz)

Digital Transformation · Senior Backend Engineer · Waggingtail

Backend behind a large device repair business - handles bookings, job state, technician updates, and the operational reporting the team runs their day on.

**Tech Used:** Workflow-driven backend design, Data modeling for the full repair lifecycle, Job and technician scheduling, Internal reporting for branches and teams

### Planolitix

[planolitix.com](https://planolitix.com)

Financial Tools · Senior Backend Engineer · Waggingtail

Financial diagnostic tool that uses cashflow modeling to show clients how their position changes across different life stages.

**Tech Used:** Financial data modeling, Long-horizon cashflow calculations, Graph-based reporting, Performance-focused SQL tuning

### Vetty

[vetty.co.nz](https://vetty.co.nz)

Digital Businesses · Senior Backend Engineer · Waggingtail

Subscription e-commerce platform for pet treatments, handling recurring orders, billing, and fulfillment.

**Tech Used:** Subscription billing engine, Order and fulfillment workflows, Inventory and logistics integrations, Customer notification flows

### AttendAssist

[devravik.github.io/attendassist](https://devravik.github.io/attendassist)

Product · Independent Software Developer

[play.google.com/store/apps/details?id=com.devravik.attendassist](https://play.google.com/store/apps/details?id=com.devravik.attendassist)

Attendance management app focused on making the daily check-in/out process simple for teachers and teams.

**Tech Used:** React Native (Expo), Mobile-first API design, Attendance data modeling, Auth and role management, CI/CD for mobile and backend

### KundaliLabs

[kundalilabs.com](https://kundalilabs.com)

Product · Independent Software Developer

[play.google.com/store/apps/details?id=com.kundalilabs.app](https://play.google.com/store/apps/details?id=com.kundalilabs.app)  
[github.com/devravik/kundalilabs](https://github.com/devravik/kundalilabs)

AI-powered Vedic astrology platform using Swiss Ephemeris for all calculations and GPT-4o for interpretations. Covers Janam Kundli, daily horoscope, Panchang, Dasha timeline, Kundli matching, and numerology across 10 Indian languages. Available as a live web app and a mobile app on the Play Store.

**Tech Used:** FastAPI (Python) backend, React + Vite frontend, PostgreSQL, Swiss Ephemeris for Jyotish calculations, OpenAI GPT-4o for AI interpretations, React Native mobile app

## OPEN SOURCE CONTRIBUTIONS

---

### Laravel Licensing

v1.0.0 · 1+ downloads · PHP ^8.1 · MIT

[packagist.org/packages/devravik/laravel-licensing](https://packagist.org/packages/devravik/laravel-licensing)

[github.com/devravik/laravel-licensing](https://github.com/devravik/laravel-licensing)

A production-ready Laravel package for generating, managing, activating, and validating software licenses directly inside your application. License keys are hashed before storage (never plaintext in the database), activations are seat-controlled, and the entire lifecycle creation, validation, activation, revocation, and expiry is covered by typed exceptions and dispatchable events.

**Tech Used:** Laravel 10/11/12, Bcrypt key hashing, Seat-based activations, Polymorphic ownership, Event-driven architecture

### Laravel Licensing Starter

[github.com/devravik/laravel-licensing-starter](https://github.com/devravik/laravel-licensing-starter)

A starter kit demonstrating devravik/laravel-licensing - a Laravel package for generating, managing, activating, and validating software licenses. This project combines Laravel Breeze (authentication) with a full license management dashboard so you can see the complete workflow in action.

**Tech Used:** Laravel Breeze, License management dashboard, Full workflow demonstration, API endpoints, Demo data & examples

### Laravel Extended Resources

[github.com/devravik/extended-resources](https://github.com/devravik/extended-resources)

[packagist.org/packages/devravik/extended-resources](https://packagist.org/packages/devravik/extended-resources)

Extended Resources is a small but powerful extension around Laravel API resources that lets you define multiple named formats using PHP 8 attributes, apply on-the-fly modifications to the serialized data, use convenience enhancements like `only()/except()`, and adjust the HTTP status code directly from the resource while still feeling native to Laravel.

**Tech Used:** Laravel 10/11/12, PHP 8.1+, API Resources, PHP 8 attributes, Response helpers

### RedditRadar

[github.com/devravik/RedditRadar](https://github.com/devravik/RedditRadar)

Self-hosted Reddit lead discovery and AI analysis platform for engineers. Monitors subreddits for hiring posts and founder pain points, scores them against a custom engineer profile, pre-filters noise before any LLM inference runs, and tracks outreach through a full pipeline - a lightweight alternative to expensive SaaS lead tools.

**Tech Used:** Next.js 16 (App Router), Prisma 7 + PostgreSQL, Tailwind CSS + shadcn/ui, OpenAI / OpenRouter / Groq, Reddit JSON API

### Go License API

[github.com/devravik/go-license-api](https://github.com/devravik/go-license-api)

High-performance, self-hosted license validation service built in Go. Covers everything from simple plugin licensing to large-scale SaaS enforcement: multi-tenant isolation, seat tracking, offline licenses (Ed25519), key rotation, webhooks, and audit logging. Validation runs entirely from an in-memory cache with no DB in the hot path, targeting sub-millisecond p95 latency.

**Tech Used:** Go 1.21+, PostgreSQL 14+, Redis (optional L2 cache), Ed25519 offline signing, Docker + Kubernetes

### TalkBridge

[github.com/devravik/TalkBridge](https://github.com/devravik/TalkBridge)

Real-time video calls with live AI-translated captions - no app, no account, just a link. Two people who speak different languages open a browser, share a link, and talk. Speech is transcribed via Deepgram Nova-2 with interim results and translated by Azure Cognitive Services in under 500ms end-to-end, overlaid as live captions on the video feed. Supports 10 languages with an LLM fallback for translation when Azure is unavailable.

**Tech Used:** Go (Fiber) + Gorilla WebSocket, Next.js 14, TypeScript, Tailwind CSS, WebRTC P2P video and audio, Deepgram Nova-2 streaming STT, Azure Cognitive Services Translator, PostgreSQL
